MS 3D CONFIGURATOR INTEGRATION

Integrate MS 3D Configurator in your website using the JS.

1. IMPORT SCRIPT:

Add the following script inside the <head> tag of your HTML page.

```
<script src="https://ms-configurator.s3.amazonaws.com/scripts/integration/3d-configurator.js">
</script>
```

2. LOAD CONFIGURATOR:

To integrate the script, establish a ** ** element with the ID "**ms-configurator-container**" within the **<body>** section. This division will be responsible for hosting the configurator. Initialization of the MS Configurator involves invoking the **msConfigurator()** method and providing the necessary arguments.

```
<div class="container" style="background-color: white;">
        <div id="ms-configurator-container"></div>
    </div>
 <script>
        var config = {
            "merchantId": "divay@mirrorsize.com",
              "apiKey": "4nJVvemj4pqhB0J9b2GYUa80r3pLB2k5Fj4svht6A",
            "sku": "KIDKANARA",
            "productId": "",
            "variantId": "",
            "language": "en",
            "userId": "gautam.thapa@mirrorsize.com",
            "apiUrl": "",
        }
        var msConfigurator = new msConfigurator(config);
    </script>
```

Config Data Description

- **merchantId**: Your Mirrorsize account email.
- **apiKey**: Retrieve apiKey from the Mirrorsize dashboard under the developer's help section.
- **sku**: The product SKU is accessible within the product section of the Mirrorsize Dashboard.
- **apiUrl (Optional):** Create an API in your backend to collect data selected by users from the configurator. Provide us with the URL for this API. We will call this API from our end and send all the details in the request payload.
- **language**: This is the default language of the configurator. If your website supports multiple languages, send the selected language's short form (e.g., "en" for English, "ar" for Arabic).
- **userId (Optional):** If you want to store the userId, include the details in the key.
- **productId (Optional):** This is the unique ID stored in your database for the product you want to customize. We will return this value in the response from the Callback API.
- **variantId (Optional):** This is the unique ID stored in your database for the product variant you want to customize. We will return this value in the response from the Callback API.

EXAMPLE:

```html
<!DOCTYPE html>
<html lang="en">
<head>
 <meta charset="UTF-8">
 <meta name="viewport" content="width=device-width, initial-scale=1.0">
 <title>MS Configurator</title>
 <script src="https://ms-configurator.s3.amazonaws.com/scripts/integration/3d-configurator.js">
</script>
</head>
<body>
 <div class="container" >
 <div id="ms-configurator-container" style=" height:100vh; background-color: white;"></div>
 </div>
```

```
<script>
var config = {
"merchantId": "divay@mirrorsize.com",
"apiKey": "4nJVvemj4pqYUa80r3pLB2k5Fj4svht6A",
"sku": "KIDKANARA",
"productId": "KIDKANARA",
"variantId": "",
"language": "en",
"userId": "",
"apiUrl": "",
"mobile": false,
}
var msConfigurator = new msConfigurator(config);
</script>
</body>
</html>
```

3. REDIRECTION & DATA COLLECTION:

After the user completes the customization and submits, they will be redirected to the provided redirect URL in MS Dashboard with the configurator's UserSessionId as query parameter. Use this UserSessionId to retrieve all the selected information. Call the API below and pass the UserSessionId to get the product details.

API ENDPOINT:

```
POST method

https://api.services.mirrorsize.com/api/sdk/configurator/product-details
```

REQUEST BODY

```
{
    "apiKey": "J1d4XMosgfC06NmnqbXGFb5WoQqXDM",
    "merchantId": "gautam.thapa@mirrorsize.com",
    "userSessionId": "231030111848882zygof"
}
